

This man has not been able to get a good price for his wheat, but by looking after his chickens and his little livestock he is getting food for his table and a very satisfactory cash return.

Representatives were present from Comet club, Garden Valley, Walther League and Stony clubs.

A charming party of young people gathered at the home of Mr and Mrs Albert Fischer on the evening of March 12th, to do honor to their son Carl, on the anniversary of his natal day. Cards and games helped pass a very pleasant evening; a dainty lunch being served at midnight. Among those present were: Mr and Mrs A. Fischer, Mrs D. Roberts; Misses Anna Miller, Ida Zucht, Christian Miller, Freda Strass; Messrs G. Clarke, Hy Traupp, Ed Daubhauser, Wm and L. Miller, C. Fischer.

Among those who came from Middle Europe in the spring of 1928 to this district, to help farmers eliminate the brush from their lands, was a gent named George Racz. He was assigned to the gang then operating on the farm of Mr. P. W. Trautman, at Golden Lake.

Mr Baer entered an action against Mr Trantman for damages, alleging 'negligence.' The injured man retained the services of Mr Alfred Koch, an attorney at Edison and formerly of Stony Plain, as counsel.

A stay of proceedings was issued, following a motion of appeal by Mr. Trantman's counsel.

Reckless Motor Driving

With the approach of spring the time draws near when once again the roads and highways of the country will be thronged with tens of thousands of automobiles and the streets of our larger cities jammed with traffic. Soon tourists will again be in our midst, while week-end trips from our centres of population to summer resorts and other vacation spots will engage the attention of the residents of all urban and many rural sections.

Is the result to be the hanging up of another new high record number of fatalities arising out of automobile accidents? In 1931 to provide another dark spot on our much vaunted civilization with as much recklessness in automobile driving and resultant deaths as were recorded in 1930? Are the more and better highways being provided all over the country to have the tragic outcome of steadily adding to the death toll because people using such better roads exercise less care in operating their cars?

Recent figures published for the city of Regina show a very large increase in the number of car accidents reported in 1930 as compared with previous years, and what is true of Regina is true of practically every city in Canada and the United States.

A United States magazine, in a recent issue, dealt with the rising death toll due to reckless automobile driving across the line. While these figures apply only to the United States, they disclose a state of affairs which is equally applicable to Canada. A few of the facts established may well be quoted.

Motor accidents in the United States, in 1930, killed 32,000 people, and injured more than 200,000—in other words, one million victims. More than 2,000 little children under five years of age were killed, and more than 45,000 were injured. The magazine notes that the World War did not take a greater toll of American lives in battle.

Remarkable as it may seem, this magazine considers that the most encouraging aspect of this appalling loss lies in the fact that recklessness was its principal cause, saying: "If carelessness and over-confidence kill and injure so many, carefulness and consideration can prevent such losses."

Evidence goes to show that the majority of accidents occurred on straight and dry roads, in broad daylight, with experienced and mature drivers at the wheel. In an overwhelming majority the machine functioned properly; the man was at fault. He took unpardonable chances.

In a striking analysis of accident reports from forty States, a well known insurance company dispels many cherished illusions on this subject. Contrary to a common impression, women were proved to be safer drivers than men. Young men at their best physical development were the worst offenders.

Improper driving and nothing else was responsible for more than two-thirds of all the deaths and injuries recorded in 1930. Speeding, driving on the wrong side of the road, and failure to grant right-of-way, all evidences of improper driving, accounted for 86 per cent. of the accidents.

Other violations of the laws as well as of common sense took a heavy toll. Failure to signal caused the deaths of 400 people, and accounted for the injuries of 20,000. More than 20,000 accidents resulted from motorists driving off the roadway. The biggest single cause of accidents, however, was the improper attempt to take the right-of-way from some other traveller—selfishness, hogishness.

As might be expected, week-end driving is most hazardous. Sunday is the worst day by far, and Saturday is next.

There was a time when defective construction of cars, poor brakes, etc., were held responsible for most accidents. Today the fact has been well established that as drivers we are not so good as the cars we operate. Men have learned to operate ships at sea safely. The records of the railroads are marvellous. Where safety is the goal, airplanes have achieved miracles in protecting human life. In other words, we can operate high-powered, fast moving machines if we put our minds to it.

What we have to learn is that safety is more important than speed. Drivers must be made to realize that they are steering three or four thousand pounds of steel in swift movement, the possible destructive power of which is enormous.

Safety is worth more than anything else. The maiming, and the killing, and the destruction of millions of property must be stopped and we, the average drivers, can do it.

La Grippe and "Flu" are Spreading

"Flu" First Appears as a Sore Throat, but
Gains Tremendous Headway
in Six Hours

AN EFFECTIVE TREATMENT DESCRIBED

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop penetrates deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Experienced mothers know how valuable Nerviline is for Coughs, Colds, Sore Throat, and the little ailments that arise in every family. Nerviline in most homes is called "Mother's Best Friend." See at all dealers.

World's Leading Flyer

French Aviator Who Awarded Building
First World Record

Director, Costa, Paris-to-New York Flyer, has been designated the world's premier aviator by the awards committee of the International League of Aviators.

Mrs. Amy Johnson, who flew from London, England, to Australia, was given highest honors among women flyers. She and Costa were received at the Bayreuth Palace by President Dönitz and presented with silver cups at a formal ceremony.

Costa's only rival at the committee session was Wing Commander Charles Kingsford-Smith, the Australian "top," and the Frenchman was chosen because he holds five world records in addition to the accomplishment of his Atlantic flight.

The committee also ordered players to be struck to honor Mrs. Victor Bruce, Maryon Riddle and Mrs. Charles Lindbergh.

Dr. Hugo Eckener was designated the world's premier dirigible pilot.

Magnesia Best for Your Indigestion

Most people who suffer, either occasionally or chronically from gas, nervousness and indigestion, have now discovered digestible diets, stomach tonics, medicines and artificial digestants, and instead, take a teaspoonful or four tablets of Magnesia Magnesia after meals with the result that their stomachs no longer trouble them. They are able to eat as they please and they enjoy much better health. These are the benefits of Magnesia, never dried the approach of meal time because they know this wonderful anti-acid and food corrective, which can be obtained from any good drug store, will instantly neutralize the stomach acidity, sweeten the stomach, prevent food fermentation, and make digestion easy. Try this plan yourself, and be certain to get illustrated Magnesia, specially prepared for stomach use.

Life Insurance More Popular

People Taking Advantage Of Advancing Policies Offered

One of the outstanding developments in the recent financial history of the United States is the remarkable growth of life insurance. The application of the principle of group life insurance to institutions and industries has made life insurance available to large numbers of persons who have never before carried any form of life insurance. The individual members of insurance in these cases are usually small, ranging from \$1,000 to \$5,000. But there has also been a marked increase in the number of large policies written. In 1931 there were 24 persons whose lives were insured for \$1,000,000 or more. In 1930 there were 23 persons carrying life insurance for that amount.—Wall Street Journal.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that, besides being an effective vermifuge, they are critical and health-giving in their effects.

Hatchery Approval Policy

By Having To Observe Federal
This Year In Practice

A survey by Canadian Bureau this year of 100,000 is forecast for the hatchery approval policy of the Department of Agriculture, according to the Minister, Hon. Robert Weir. Under the scheme, 124 hatcheries are operated, producing about 5,000,000 baby chicks a year, which are available to farmers at low prices. Records show these chicks to have a low mortality rate.

Drive Asthma Like Magic. The immediate help from Dr. J. B. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the moist mucous passage of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is mild, by degrees throughout the chest.

More To The Point

Chick—"When you know, sir, don't forget the sign. Have you left anything?"

Guest—"It should be changed to 'Have you anything left?'"

Unusual Operation

From 40 Dental Plates In Removal
From Lung Of Patient

A piece of dental plate, measuring 1 1/2 inches by 1/4 inch and holding three teeth, was taken from the lung of Victor Brander, Cockburn lumber merchant, by Dr. J. B. McMillan, of the Lockwood Clinic in Toronto, after one of the most unusual operations in medical records.

Four months ago Brander was seized with a violent coughing spell, and, without knowing it, bit upon the dental dental plate. The broken portion passed down his throat and lodged in his lungs.

The bronchoscope, instrument used for retrieving objects from the lungs, was used and it took more than two hours of very delicate manipulation by the doctor before he was successful.

Greenhouse Grain At Ottawa Yields Two Crops A Year And Facilitates Research Work

About the end of April wheat harvesting will begin at the Canadian Government Experimental Farm at Ottawa—in greenhouses.

Greenhouse grain is usually a novelty in Canadian farming practice, but it is one of the most important and significant developments of recent years in connection with cereal research. The cereal greenhouses were built in order to complete two years' research work in one year. During the hours of darkness and on dull days a powerful electric lighting system supplies the light essential to quick growth.

"We are two years ahead in our work since the new greenhouses went into operation—in other words, we know as much now about the varieties we are developing at the present time as we would have known under the old system in 1935," said L. M. Newman, Dominion Cerealist.

Some idea of the practical value of cereal research work through the two-crop-a-year system now possible is afforded by a contrast with what is now possible and the history of Marquis wheat. From eight to ten years of research prior to 1934 resulted in the development of the first head of Marquis bearing 99 heads in that year. From that single head by 1935, a single crop produced 100,000 bushels of Marquis wheat. The second greenhouse year in operation during the preliminary development period, Marquis would have been ready for distribution to Canadian farms at least four years earlier, and this would have meant many millions of dollars to Canadian farmers during a period of bumper crops and record prices.

In the case of the crop which will soon be ready for harvest, the seed from field test plots harvested in the fall, was sown last October, and the seed from the greenhouse crops will be planted in field plots in May. The number and variety of individual types of grain which are developed in the greenhouse winter crop is rapidly increasing.

Railroads Solve One Problem

New Radio For Signaling On Long Freight Trains

Railroads, which have been trying to find a more suitable and reliable means of instant communication between front and rear cars of long freight trains, other than the present method of signaling with the whistle, apparently have solved the problem by the development of a short wave radio apparatus.

Low powered telephone transmitters installed in both ends of a train will permit the flashing of orders instantly and also make possible communication with a moving train. The signaling apparatus consists of low powered short wave transmitting and receiving equipment adjusted so that the engineer or conductor desiring to signal or converse, need only depress a switch, which in turn automatically signals the locomotive.

This development marks another utilization of radio possibilities and demonstrates how indispensable are the rail carriers in experimenting with new devices in order further to improve their services and to protect their passengers.

Men, like birds, are restless when they lose their temper.

The Loner Man

"Leave off—leave off—I would rather you called the police!"—Mama, shouting.

W. H. V. 1935

May Prove Very Useful

New "Electric Ear" Could Analyze Sounds Of Cities

A portable "electric ear" is expected to be the subject of a whirling display under way in Washington, D.C., at the Washington Research Laboratories, West Pittsburgh, Pa., U.S.A., by J. P. Pette, who developed it.

So compact that it fits into an ordinary suit case, this new "electric ear" can easily be taken to wherever sound may be under observation.

In line with the studies of various cities in an attempt to reduce the objectionable noise which, it is said, are gradually making nervous wrecks of the human race, the first step is to analyze the noise and find the parts which make it up.

"Noise is a queer phenomenon," said Mr. Pette. "It is usually made up of various sound waves and is seldom found in the pure state. When an apple is dropped on a wooden floor, the 'thud' which strikes the human ear is made up of a great number of sounds having no more resemblance to the 'thud' than fear, with, talking powder, butter and eggs have to a finished cake."

"When the apple hits the floor, the impact starts a series of complex 'vibrations' which in physics are represented by waves, called sound waves. It is entirely possible to 'analyze' these by two sound waves which it has made other much like the teeth of two saw blades."

"To a somewhat different application it is also hoped that in the future this new portable 'electric ear' may be used as an advance tool for diagnosing malady and propelling. So much more sensitive than the human ear, it is anticipated that it will hear heart-strings, pin-strings, piano strings, warped or split propellers long before they are loud enough—and consequently dangerous—to be heard by the human ear."

Wild Specimens In Canada

Protection Of Wild Life Has Proved Worth While

Conservation of wild birds in Canada was assured by the government when there was still a good deal of unpopulated wilderness and few species were threatened with extinction, the New York Times points out. One naturalist is well known from coast to coast for his primitive where wild geese and ducks are fed and protected. In the Dominion there are more than forty bird sanctuaries. On the north shore of the Gulf of St. Lawrence there is a chain of ten islands where sea birds breed without molestation. A census taken in 1930 showed their number to be 100,000 of sixteen different species. This did not include "young birds hatched during that year." The increase since 1925 was estimated at nineteen per cent.

Many farmers in Japan are taking up weaving at home as a side issue.

Question Of Farming On A Large Scale As Against Survival Of Smaller Individual Farms

The past couple of years, with their gloomy markets and low prices, have forced Canadians to give attention not only to their own farming methods, but to those of other countries. Russia and the Argentine have both entered the market which Canada has come to consider largely her own, and Canada is coming to realize that if she is to remain one of the major wheat-exporting countries of the world she must do something to reduce the cost of production. The United States, which has a home market for all but a relatively small fraction of its output, can, if it chooses, limit its crops and withdraw from the world wheat market altogether. Some have suggested that Canada do the same. But wheat yields much more largely in Canada's production and in Canada's exports than it does in the exports and production of the United States, and it would be a far more difficult and far more serious thing for Canada to admit that she is beaten in the contest than for the United States to do this. Besides, Canada has advantages which the United States can not boast. She has cheaper land, she can grow larger crops, and she can grow wheat of a better quality.

Canada, for several reasons, must go on producing wheat in large quantities, and selling it abroad. She needs her wheat exports to balance or help balance the great quantities of goods she imports. She has organized herself as a wheat-producing wheat-exporting country, with elevators, railroads, docks and canals for the transportation of the product. And she has large areas of land which can not profitably be turned to any other purpose.

But recognition of the situation such as these are not going to solve the problem. Mr. W. W. Bennett, who was one of Mr. Bennett's expert advisers on wheat at the Imperial Conference, has estimated that the average cost of producing a bushel of wheat in western Canada is 75 cents. Number 1 Northern wheat sold on the Winnipeg Exchange recently for less than 60 cents a bushel. A condition of affairs like that can go on for a year or two, but can not continue indefinitely. The farmer can only continue to produce wheat by producing at a profit. In the Argentine, wheat is produced on farms of great size by people whose standard of living is low. In Russia, it is being produced on communist farms by people whose standard of living is also much lower than that which prevails in Canada. Russian wheat also has been forced upon the market at ruinous prices in order to create a credit to

most farming operations. But that was a device to meet an emergency, and need not be regarded as evidence. Canada will, however, have to meet the low-priced Argentine and Russian grain on the world market. How can she do it?

Some men who have studied the situation, Mr. H. R. Spencer, who represents British Columbia in the House of Commons, believes western Canada could turn to large farms as the Russian mode—in other words, mass industrial farming. Others see no advantage in enlarging farms beyond the size which will give the maximum employment in the best type of modern machinery. Others again, like Mrs. W. R. Motherwell, former minister of agriculture, are inclined to believe the small farm will survive. The economics of the situation will, of course, decide for the end. If the small farmer can not make a living, the small farmer will not remain. He will disappear, just as the small manufacturer has, to a large extent, given way to the great factory, and as the small shopkeeper is now retreating before the department store, and the department store. But Canada, in her own interests, would do well to take what steps she can to save the small farmer from the fate which many believe is threatening him. The small farmer is the foundation on which this country rests. Capitalist and laborer in one, he is industrious, frugal and independent, and we can ill afford either to allow his standard of living to be reduced, or to turn him to a more vicious on a large wheat-growing estate. There is probably not very much danger that Communist ideas will prevail on this continent. But the principal bulwark against them is the small farmer who owns his own land and in his own hand and can use to advantage in the socialization of either his property or his labor. — Vancouver Province.

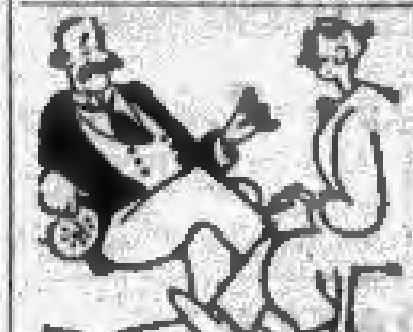

Canadian Poultry For Africa

Shipment From Montreal, B.C., Going To Natal

"It's a long way to Natal River," cooed six frisky white guinea fowls on the railway platform at Montreal recently. It was their first transfer on a 36-day journey from the farm at Westholme, Vancouver Island, where they were raised. They were bound for Vancouver and across Canada to Natal, South Africa. At Natal they will be transhipped on the government railway to Mool River, Natal, where they will take up permanent residence. The birds are to provide a change of blood and to be used for foundation purposes by a Natal poultryman. Shipments of poultry from the same farm have recently been made to the British Isles, the Orient, Hawaii, several parts of Canada, and the United States.

Canadian Trees Good For Britain

The Forestry Commission of Great Britain is using Canadian Birch spruce seed to a considerable extent in the planting of new forests in that country. The total quantity of seed of this species sent to Great Britain up to date by the Forest Service, Department of the Interior, is over eleven thousand pounds (five and a half tons). This seed has all been extracted at the post-extraction plant of the Forest Service at New Westminster, B.C.

Food Merchant: "I have found a substitute for fish. Taste the same and costs less than any substitute of fish these days."—Shocking, Berlin.

FESTIVAL OF ENGLISH DRAMA

Weymouth, Weymouth, England. Here, in the beautiful port country town, last night the Welsh border, will be staged from August 2 to 20, inclusive, the annual Festival of English Drama. To George Bernard Shaw (right), world-famous author and playwright, will be dedicated the 1935 festival. Sir Harry Jackson (left), British millionaire and theatrical producer, is directing the event, which will include a new play by Shaw. From the 1930s long ago, a famous tall leader member of the approach of the Spanish Armada.

SUNDAY SCHOOL LESSON

MARCH 25

THE USE AND ABUSE OF GOD'S GIFTS—TEMPERANCE LESSON

Golden Text: "Be not drunken with wine, wherein is riot, but be filled with the Spirit."—Ephesians 5:18.

Lesson: Luke 12.

Devotional Reading: Matthew 4:16-24.

Explanations and Comments

The Warning Against Covetousness, verses 12-21.—A certain rich man, so the parable of Jesus begins, whose fields yielded more than his barns would hold, propounded to himself this query, "What shall I do because I have not where to bestow my fruits?"

"God has provided barns for superfluous corn in mouths that hunger, limbs that shiver, homes where the orphaned and the widowed sit in want. To store in these treasure-houses is the luxury as well as the duty of wealth."

The rich man proceeded to answer his query: "This will I do; I will pull down my barns, and build greater. And I will say to my soul [some one observes that he was talking to his stomach under the impression that he was addressing his soul], Soul, thou hast much good laid up for many years; take thine ease, eat, drink, be merry." "He does not say to it, 'New, my soul, let us study art, and music, and literature.' The finer instincts have gone; his feeling for God, his enthusiasm for humanity. He has so lived that at the end of his years he has lost the capacity to live. He has made a living and made a life."—J. H. Jowett.

"It is a shameful conception of wealth which regards it only as a means to ease and luxurious living. The ease it brings is, or should be, only the reward for the heavy responsibilities it imposes. The man who is rich by reason of the great business interests he has built up is accountable to the community for the honesty and usefulness of his service, to his hundreds of thousands of employees for such a conduct of the business as will assure them of their means of livelihood, to his own conscience for laborious and unremitting attention to the wearisome details of business management. Too often the loss of leisure, health, and happiness in the penalty he pays for the luxuries he enjoys."

"The rich fool made three mistakes: he mistook his body for his soul; he mistook time for eternity; and he mistook himself for God, the Ruler of all destinies."—James Orr.

God said unto him, "Thou foolish one, this night is thy end required of thee; and the things which thou hast prepared, whose shall they be?"

The Parable Of Faithful and Unfaithful Servants, verses 25-30.—Watch eagerly for the coming of the King, like servants of a lord who, with lance and sword, and with lamps burning, await his coming in the night time. "In the spiritual sphere the lamps are the noble purpose in life, and the burning lamp is the spirit of hope." When the master finds them watching, he in his joy will himself take the place of a servant, make them sit down, and serve them. Blessed is that master who finds them watching in the second or in the third watch—the time when men are most liable to give way to sleep. Then Jesus used a new figure, that of a master of the house on his guard against the coming of a thief at an unexpected time. And the conclusion of the parable is: "Be ye also ready; for in an hour that ye think not, the Son of Man cometh."

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

Manufacturing in the West

Figures Would Indicate Phenomenal Development Within Recent Years

J. M. Davidson, managing secretary of the Industrial Development Board of Manitoba, pointed out in the course of an address in Montreal recently, that industrial production in Alberta exceeds \$100,000,000 annually; in Saskatchewan, \$60,000,000 and in Manitoba, \$100,000,000. There are \$10,000,000 more capital invested in Manitoba's manufacturing industries, he added, than in all the livestock, poultry, implements and machinery in the province, and Manitoba's manufacturing output last year was more than double the combined western returns from dairy products, field crops (exclusive of grain), poultry and honey.

Advertising Benefits

Advertising is essentially educational. It lifts men's minds out of ruts. It creates a desire for the things. It spurs ambition and gives energy. It has walked hand in hand with progress in our time, and owes a step ahead.

Here's another attractive

MAGIC

MENU

Look for this mark on every tin. It is a guarantee that Magic does not contain alum or any harmful ingredient.

Try Miss Caldwell's Recipe for "RASPBERRY BISCUITS"

- 2 cups flour
- 1/2 cup Magic Baking Powder
- 1/2 cup butter
- 1/2 cup sugar
- 4 tablespoons shortening
- 1/2 cup milk
- 1/2 cup of sugar
- 1/2 cup of aprons

Mix and sift the dry ingredients. Cut the hard, cold shortening into them with a knife, using a quick, short, chopping motion or reduce the hard cold fat to tiny particles with a pastry blender or a steel-pronged fork. When the mixture resembles a very coarse meal, add the liquid, mixing quickly and lightly. Turn out the dough on a slightly floured board; pat it down lightly or roll it to a thickness of about one inch. Shape with a small cutter or cut in squares with a floured knife. Dip the small lumps of sugar into syrup from jammed or fresh raspberries. Press a lump into each biscuit... forcing it well down into the dough so that it will not run down the sides when baked.

Place the biscuits on a greased pan or baking sheet and bake in a very hot oven, 450° F., 12 to 15 minutes.

Made in Canada

MAGIC Baking Powder ensures better baking results

Does Not Appear Weak

Lightning Strikes Which Split Great Rocks Compel Respect

A 5,000,000-volt stroke of lightning having been caught and measured on an electric line in Arkansas, the scientists state that it is considerably weaker than machine-produced electricity.

This conclusion may satisfy electricians of note, but the ordinary man should beware of trifling with lightning when it is raging about. Strikes that split great rocks, hit and raze big buildings and wipe out herds of cattle, are quite capable of disposing of a mere man in astonishingly quick order.

Lightning is a natural force that commands respect.

Perfume Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

Doctors Beware Millions

Investigations show that the medical men in the United States give away a sum of \$365,000,000 annually by donating their services to people who cannot or do not pay. On this basis of reckoning the medical fraternity in Canada must be giving away annually some \$60,000,000. Their critics have no such record of philanthropy to show.

Aching CORNS STOP HURTING INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, etc.

PUTNAM'S

Atmosphere Of Earth

Hundred Miles Deep

But Not How Atmosphere Depth Of 9,000 Miles

New discoveries about the sun's atmosphere have been disclosed to Dr. Albert Einstein at the Mount Wilson Solar Observatory, Pasadena, California, by Dr. Charles E. St. John, of the Carnegie Institution, of Washington. The sun's atmosphere is 9,000 miles deep, compared with the 100 mile depth of the earth's atmosphere. The outermost layer of the sun's atmosphere is composed of the light gases, helium and hydrogen. The sun's atmosphere is quite different, the outermost layer being of ionized calcium, forty times heavier than the layer of hydrogen 3,000 miles closer to the sun.

In the earth's atmosphere the first seven miles from the earth form a layer in which wind storms occur up to a velocity of 300 miles per hour. At 20 miles up, argon, one of the constituents of air, disappears. Farther up there is no more oxygen, and at 70 miles nitrogen disappears, leaving only helium and hydrogen for the last thirty miles.

For Both Home and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from indigestion and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

An Exp-Priment Human

Carbon Monoxide Gas Most Dangerous—Can Kill in Five Minutes

A recent bulletin issued by the Health Department of the Province of Quebec, contains an important reference to the danger created by the presence of carbon monoxide, a poison all the greater because it may extend even to an automobile in motion. The note is well worth careful perusal by all motor drivers. Carbon monoxide is a colorless, tasteless, practically odorless gas, and is without any irritant action on the mucous of the respiratory tract. Because of these properties, it is impossible to detect it by any of the five senses. It is, therefore, a most treacherous gas, since it can be present in dangerous quantities without giving any warning whatever.

British experts a record phenomenon—baking season this year.

To Speed Up Traffic

Horses Banned From London Street During Certain Hours

For the first time in the history of London, horse traffic is to be forbidden to one of the city's principal streets.

The ministry of transport has announced an experimental scheme operative during the coming spring by which Oxford Street, one of the great east and west thoroughfares, will be closed daily to all slow moving traffic, including horse-drawn vehicles, between noon and 7 p.m.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Gray's Worm Expeller to drive out the parasites.

Nobody Wants War

Monarch doesn't want war. Japan doesn't want war. France doesn't want war. The United States shuns war. It might be well to watch Switzerland.—Tokio, Blade.

"Do Not Hesitate to Try It"

"Your Vegetable Compound is a good medicine. Anyone who is in poor health should not hesitate to try it. When I was taking the Vegetable Compound I tried the simple Liver Pills I found in the package. I have taken them every night since and I can feel myself improving. I am so thankful for the good they do me that I have told several women about it."—Mrs. G. W. Poley, 215 Main St., Bedford, Ontario.

Lydia E. Pinkham's Vegetable Compound

POOL ELEVATOR PROBE IS ASKED FOR MANITOBA

Winnipeg, Man. — Charges that Manitoba Wheat Pool elevators deprived their farmer-shareholders of "excessive sums" through overages and under-grading may be probed by the provincial government.

Premier John Bracken had before him for consideration two requests for the appointment of a royal commission to inquire into the operation of the Pool elevators. One was from J. K. Murray, vice-president of the Alberta Pacific Grain Company, Limited, the other was delivered from Colin H. Burnett, president of the Manitoba Wheat Pool.

With both the accused and accuser demanding a governmental investigation, it seemed certain that a commission would be appointed, although grain authorities here thought the premier might wait action of the Dominion government which, it has been rumored, soon will appoint commissioners to conduct a probe into grain marketing.

Premier Bracken refused comment on the letters. He said the government must have time to study the texts before announcing the stand to be taken. "I have nothing to say at present," he told newspaper interviewers.

"That should be satisfactory," said Mr. Murray, when advised that the president of the co-operative organization had requested a commission of investigation. "My charges are not an attack on the Pool by the grain trade," he said. "I sought the probe on my own responsibility, in the interests of my many good friends among the farmers."

Mr. Burnett branded the charges of "extravagantly high expenses," etc., "absolutely false" in his letter to the premier, and urged that a commission be appointed "as soon as possible" to probe the allegations.

In a letter to Mr. Bracken, Mr. Murray made his charges against the Pool elevators operation, and urged a government inquiry. He charged that farmers were "unwielded" into becoming shareholders in Pool elevators, had been deprived of large sums through overages and under-grading to meet "extravagantly high expenses" and that the latter had been conceded from shareholders by "book-keeping devices."

The letter from Mr. Burnett to the premier reads: "I have seen in the press a letter from Mr. Murray, former manager of the United Grain Growers, in which he charges the Manitoba Wheat Pool elevators with practices which by inference are equivalent to the deliberate cheating of the members of the Pool elevator associations, and he demands you to institute an investigation into Manitoba Wheat Pool Elevators, Limited."

"These charges are absolutely false, and I am instructed by the board of directors of the Manitoba Wheat Pool Elevators, Limited, acting on behalf of the members and patrons of the local Pool elevator situation, to request you to have a commission appointed to fully investigate the above mentioned charges as soon as possible."

Canadian Dollar Above Par

Second High Quotation in New York This Year

New York.—The Canadian dollar set above par March 11, for the second time this year, being quoted in the money market here at 1.54 of one per cent premium.

The strength of Canadian funds has been attributed to Canadian financing in the bond market and bankers attribute the gain to placing of an issue of \$11,970,000 City of Montreal gold bonds.

No Change Contemplated

Washington, D.C.—It was officially stated that President Hoover is contemplating no change in relations between the United States and Russia. Secretary of State Henry L. Stimson, in planning a study of the Russian situation and this has led to rumors a change in the relations between the two countries was contemplated.

28, M. U. 1934

To Assist Farmers

Government Grants For Promotion Of Cattle Raising

Ottawa, Ont.—Government grants for the promotion of cattle raising in Western Canada were announced by Mr. Robert Weir, Minister of Agriculture. With a view to assisting farmers to establish themselves in the breeding of cattle for either beef or dairy purposes, the government will pay freight charges on carload lots of accredited stock from Eastern Canada.

Freight charges will be refunded, Mr. Weir stated, providing the consignee forwards to the acting livestock commissioner at Ottawa the receipted freight bill and a formal statement showing that conditions attached to the grants have been complied with. In order to benefit, the purchaser must show that the carload consisted of at least 12 head of female cattle, not under eight months and not over five years of age.

Only cattle that have been declared by a Dominion veterinarian to be free from tuberculosis or other diseases may be included in a shipment and the animals must be shown to be of merit from a producing standpoint. The new policy goes into effect immediately.

Railway Asking Fifty Million Stock Issue

C.P.R. Has Forwarded Official Notice To Shareholders

Montreal, Que.—At the 30th annual meeting of the Canadian Pacific Railway, to be held here May 8, authorization will be asked for an issue of \$50,000,000 ordinary capital stock, in amounts, on such terms, and at such times as the directors shall decide. Official notice to this effect has been forwarded to the shareholders.

Toronto, Ont.—"While no direct explanation was forthcoming to explain why the Canadian Pacific should require an additional \$50,000,000, if approved, it is generally understood that it indicates a continuation of the company's expansion programme," the Mail and Empire says.

"It has been known for some time that the Canadian Pacific plans expansion of its rail service through the Canada west," the newspaper continued.

Many Assisted Under Joint Relief Scheme

Labor Minister Issues Statement On Work Given Unemployed

Ottawa, Ont.—The joint Dominion-provincial unemployment relief scheme which came into operation last September, has provided work for at least 231,351 persons, Senator G. D. Robertson said in a press release. This figure did not include the total for Quebec province but did include the number of men given work through special efforts of the Canadian National and Canadian Pacific Railways.

The reports from Saskatchewan indicate that the total number of men given employment was 18,564 up to February 26, 378,174 man-days work having been provided. In addition 14,151 individuals were given direct relief.

Animal's Paradise

Washington, D.C.—All the caribou in the United States—400 head—will be government charges when Isle Royale, in Lake Superior, becomes a national park. They are there now, along with 2,000 moose and sundry beaver and deer. Isle Royale is an animal's paradise with 54,000 acres in which to roam.

Air Company Organized

Winnipeg, Man.—Primarily for the transportation of miners and supplies to the new mining areas of Great Bear Lake and Copper Mine River, in the Northwest Territories, a new Canadian aviation company, with capital of \$100,000 and a fleet of six planes, has been organized.

Will Hold Investigation

Montreal, Que.—Security protective committee has been formed, under the chairmanship of Hon. Charles A. Dunning, to "study the whole Canada power and paper situation in the interests of the security holders," states an announcement issued here.

WILL GO TO LABRADOR

John Dork L. Feltman, of Springfield, Mass., who will start for Labrador, in May, to teach the women of that land how to preserve the few fruits and vegetables that can be grown in the space of two months, for use during the long cold winter. Summer comes to Labrador for a brief two months to move on again before the onslaught of Arctic winter. Miss Feltman, a graduate of Massachusetts Agricultural College, will work under the banner of the Goodwill Mission.

Woolen Mill Owners Are Visiting Canada

Bridge Between Scotland Being Bought By Scotch Manufacturers

New York.—Four representatives of woolen manufacturers of Scotland arrived here on the liner "Olympic" on their way to Canada for the purpose of promoting better business relations with the Dominion. There was a possibility they would discuss arrangements for establishing branches of representative firms in Canada. They will also visit throughout the United States. Their Canadian itinerary will include Vancouver, Winnipeg, Toronto and Montreal.

French Money For Sale

Ottawa, Ont.—Once again, France is represented in Canada by her own minister, Charles Arsene Henry, minister plenipotentiary to Canada of France, accompanied by Madame Henry, has arrived in Ottawa from New York. At Montreal M. Henry said he thought France would prove a good market for Canadian wheat as she has not committed herself to obligated purchases from European countries.

For English Trade

London, England.—The creation of Empire Marketing Board poster frames in Canada to demonstrate work being done by the board in promotion of the sale of British products in Britain is being considered by the government, Rt. Hon. J. M. Thomas, secretary for Dominion affairs, stated.

Work For Unemployed

Supplies More Relief Money Spent In Manitoba Than Any Other Western Province

Winnipeg, Man.—Hon. W. L. Chisholm, Minister of relief projects, replied to Conservative charges that Dominion government money had been withheld from unemployed in Manitoba with an intention that more unemployment relief money had been earned in Manitoba than any other western province. He told the legislature that projects financed jointly by the Dominion, province and municipalities had been started promptly last fall and would be continued in the spring.

This province, said Mr. Chisholm, had led the way in providing jobs for the out-of-work. Instead of money being withheld, it had been paid out in late fall and winter construction. More would go to men now out of jobs when some of the largest projects were started in the spring.

By using Dominion Government relief money in constructing Manitoba's link of the Trans-Canada highway, Mr. Chisholm said more men had been employed than if the province had done the work alone. A "wider and better" road would be the result, he added.

Wheat Exports Increase

Shower Volume Is Shown During Past Seven Months Than Corresponding Period Last Year.

Ottawa, Ont.—Wheat is moving freely through export channels, according to a report issued by the Dominion Bureau of Statistics. During the seven months ended February 26, exports totaled 145,564,000 bushels, as against 95,470,000 bushels in the corresponding period a year ago.

Shipments of Canadian wheat from United States ports are not included.

Despite the heavier volume, lower wheat prices kept the total value down, the figure being \$111,725,000, as compared with \$117,420,000. Of the total, 94,746,000 bushels went to the United Kingdom, 7,722,000 bushels to the United States, and 38,136,000 to other countries.

Arranging New Mail Service

Sea and Air Service Will Run Be Connected

London, England.—An aim in the connecting air service is available, letters prepaid for air transmission, will be carried by sea from Great Britain to Belle Isle and thence taken by air to Montreal and beyond, the assistant postmaster-general E. P. Friend, announced in the House of Commons.

Arrangements to this effect have been completed with the Canadian authorities, and the date of the opening of the service and the fees to be charged will be announced in due course.

NAVAL ACCORD IS MADE PUBLIC IN LONDON

London, England.—Limitation of French and Italian naval programs until 1936 is definitely laid down in the terms of the British-French-Italian naval accord, made public recently.

But even more important than its technical provisions in the opinion of the three governments concerned, the agreement brings European peace measurably closer and provides a point of departure for the disarmament conference at Geneva next year.

The accord covers building programmes for battleships, cruisers, aircraft-carriers and submarines, in substance as follows:

Battleships—Both France and Italy are given the right to complete before December, 1934, two capital ships whose displacement shall not exceed 20,320 tons, and whose gun calibre shall not exceed 12 inches.

Cruisers—Both nations agree that after completion of the 1930 class they will build no more big cruisers with armament larger than six-inch guns. In the small cruiser category they agree that tonnage of new construction to be completed shall not exceed the tonnage which is replaceable in this category before December 31, 1935.

Aircraft-carriers—Each nation may build 24,000 tons in this category.

Submarines—Both countries agree not to include any submarines in the 1931 programme, and not to lay down any further submarine tonnage before 1935.

Essence of the agreement is maintenance of the status quo in tonnage ratios, France retaining an estimated superiority of 150,000 tons.

The terms were made public here in the form of a memorandum to parliament by Rt. Hon. Arthur Henderson, British Foreign Secretary, and Rt. Hon. A. V. Alexander, First Lord of the Admiralty, who achieved the agreement in conferences with representatives of France and Italy.

Gasoline Prices Reduced

Cut In Announced In Prices For Eastern Canada

Montreal, Que.—Gasoline prices in Ontario, Quebec and the Maritime provinces were reduced this morning.

The reductions follow: Toronto, the Island of Montreal, and principal cities in Western Ontario, 2½ cents per gallon; elsewhere in the province of Quebec and Ontario, 1½ cents per gallon; Maritime provinces, one-half cent per gallon.

The changes were announced by John Lewis, president of McColl-Pratt's Oil Company, who said all refiners had decided on the changes. It was the second downward revision of prices in about a month, and followed the establishment by the Ottawa Government of a 2½ cents protective tariff on the products of Canadian oil refineries.

Rules Of Living

Gandhi Gives Four Commandments To His Followers

Almohadabad, India.—Mahatma Gandhi gave four commandments to his followers recently.

When they asked him what their conduct should be he replied:

- "Don't tell lies."
- "Don't use abusive language."
- "Don't smoke."
- "Don't eat sweets."

A youth asked plaintively, "How about tea?" and Gandhi replied with a broad smile, "You may drink tea. Drink it from the River Sabarmati." The Sabarmati is the holy river of Gujarat.

Gandhi Of John Verne

Paris, France.—John John Verne, whose grandfather wrote "Twenty Thousand Leagues Under the Sea," has called for New York on the liner "Lafayette," to be a guest at the launching of the submarine "Nautilus," in which the Robert Wilkins plans an undersea expedition to the North Pole. Verne is a police magistrate in Rouen.

Here are shown Earl and Countess of Bessborough. The Earl of Bessborough has been appointed the new Governor-General of Canada in succession to Lord Willington. Widely experienced in parliamentary and financial affairs, Earl of Bessborough is now 51 years of age. The Countess is the daughter of Baron de Mandat de Paris. They have a son and daughter.

Lady Curlers Entertained.

On Tuesday evening March 17th, the members of the Ladies curling club were entertained by Miss Mabelle Clarke at the home of her parents, Railroad ave.

Mrs W E H Lewis, Mrs Hy Oppertshauer and Miss Clarke were hostesses.

The bridge prizes were won by Mrs Connolly and Mrs Sherwin of Spruce Grove, and Mrs Geo Oppertshauer.

Prizes for the Points competition were presented to

For Sale, 1 Ford Main, 11 years old, wt. 1350; 1 team of Brown Mare 5 and 8 years old, weight 2400; 1 team of Blacks, mare and gelding, ages 4 and 5, wt. 2400 lbs; 1 Black Gelding, 4 years, wt. 1250 lbs. JOHN WALTON, 14 miles west of Holborn, Pontefract, Phone R1413.

By the Grace of Creditors

In a recent debate in the Legislature, in which he took part, concerning loans and interest, M J Connor said he did not like to see "farmers living year from year, only by the grace of creditors," but he felt that such a condition was inevitable with the present rates of interest on money loaned.

Mrs Hy Oppertshauer, Mrs Lewis, Mrs Donaldson, Mrs Drabbin.

The guests were Mrs G W Donaldson, Mrs R M Outway, Mrs W J Connolly, Mrs R N Sherwin, Mrs J Elder, Mrs J Lory, Mrs F W Yeats, Mrs S Zucht, Mrs G Oppertshauer, Mrs A K Michael, Mrs J F Clarke, Mrs R A Walton, Mrs O G Wudel, Miss Mary Enders, Miss Bertha Wudel, Miss Clara Miller.

Stony Plain and District

Roy P G Sutton is now the proud owner of a new Pontiac sedan, purchased from Agent Pidgeon.

Having recovered from a minor operation on his hand, Mr Sinner expects to re-open his tonorial parlor today, the 19th.

Geo Kuehl, Edison, was a business visitor in Stony on Tuesday.

The Curling Club's annual social evening and dance, held last Friday evening in Moose hall, proved to be a very successful event.

Holborn U. F. W. A. are holding a dance tomorrow night, the 20th, in the Hall. There will be a drawing for a quilt. Good music.

Attention is directed to the advertisement on page eight re the passing of a bylaw by Inga Councilors, putting in force the provisions of The Town Planning Act by creating zones in the Edmonton Beach summer resort.

At the inaugural meeting of Inga Councilors on Friday Mr F H Krays was elected Reeve.

Barth's Orchestra played for the big St Patrick dance at Onoway on Tuesday night, a good crowd of dancers going up from Stony with them.

What promises to be a good afternoon's sport will be seen here on the 22nd, when a hockey double-header will be played—a team coming from the City and one from Evansburg, to meet local players.

Before the P. M.

Magistrate E Williams had two major cases before him in the local Court on Monday. A Sherrie, a cattle dealer of Edmonton, had purchased a bunch of cattle a short time ago from Mr M Schellenberger of Spruce Grove district in the sum of \$200, and had given a check on an Edmonton bank for this amount. Later, the check was returned, branded NSF—Continuing negotiations to have this made good, and getting no satisfaction, Mr Schellenberger had the accused haled to court. Magistrate sentenced Sherrie to three months at Fort Saskatchewan.

Adolf Kulak, of Rosenthal district, charged with attempted breaking and entry with intent to commit an indictable offense, was given a preliminary hearing. After several witnesses for the prosecution had been heard, the Magistrate adjourned the case for one week.

Baseballers Organize.

A meeting of baseball fans was held in the town hall on Feb. 12, for the purpose of organizing an Intermediate ball league of the teams in the district. Seven teams are interested in the league, and it is quite certain that at least six of these will be admitted to the new league.

The teams which have applied are Stony Plain Intermediate, Winterburn, Hurlford, Rosenthal, Comox, Winterburn Indians and Waller League. Another meeting will be held in Stony Plain Friday March 27, at which an election of officers will be held, and a schedule of the games drawn up.

Spruce Grove News.

At the bonspiel just completed at Stony Plain Ladies' curling rink, Mrs Beutliers was on the winning skip's rink.

Local residents will shortly be delighted by the new Neon sign which Mr Nichols has completed erecting in front of his restaurant.

Another sign of an early spring in the increasing interest farmers are taking in the purchase of new agricultural machinery.

The local rink of curlers played their "turn" in the bonspiel at Stony on Monday night, and were entertained by the President at the close of play.

Quite a number of farmers of this district who had taken an interest in the case of cattle buyer Sherrie, who had been issuing n.g. checks, were present in Stony on Monday at his trial.

Spruce Grove scored another victory, when two local ladies, Mrs R N Sherwin and Mrs W J Connolly won two of the three prizes given at the ladies curling club entertainment in Stony Plain on Tuesday evening.

Ph Schram commenced operations this week at his saw-mill on 58 53 tws, where the logging had been done by Ph Fischer.

Here and There

Small boats have been shipped recently to the Boston, New York and Chicago markets from Bathurst, N.B. The value of these shipments is placed at about \$25,000.

An increased enrollment in both common and high schools, an increase in teachers and in average attendance were indicated in the report of the schools of New Brunswick for the year ending October 31, 1935.

Aggregate value of the insurance in Canada, according to latest available information, was \$1,160,000,000 or about \$23.45 per capita of the population. Its value has more than doubled in Canada since 1925.

Last year's catch of salmon in British Columbia totaled 216,540,000 pounds, the highest ever recorded. About 3,220,000 cases have been canned, most of it to be exported to different parts of the world.

Good progress was made in 1935 in civil aviation in Canada, particularly in commercial flying. A total of 32,452 hours was flown, an increase of 7,587 hours over the flying time of registered aeroplanes in 1934.

An advance of about 300,000 in net tonnage handled at the port of Vancouver during 1935 is shown in the annual report of the Vancouver Merchant Exchange, tonnage in 1935 being 12,774,421 against 11,384,771 in 1934.

Latest reports on the output of the central electric stations in Canada states that in 1935 power generated from such stations totaled 17,828,321 thousands of kilowatt hours, an increase of 165,245 thousands of K.W. hours over 1934.

When the new 42,300-ton Empress of Britain, Canadian Pacific Atlantic liner, goes on a west cruise, she will break at least 27 records. Kings in Southampton and New York she will be the largest vessel ever to enter world cruise ports.

Prediction of a favorable year for the fruit growers of the Annapolis Valley is already being made for 1935. In that super-abundant of the Government Experimental Farm, Kentville N. S., although there is every indication of an excellent crop, adding that fruit buds had formed unusually well and were plentiful.

Statistics gathered from cities and towns having a population of 4,000 and over show that in 1934 such centres with a total population of 3,355,785 the number of police officers employed was 5,004, or one officer to every 671 persons. As an instance of their efficiency it is reported that of the 11,189 automobiles stolen in the year 1934, all but 19 were recovered.

While industry and commerce are preparing their plans and methods for low-cost operation and quality service in the coming season for home and export markets, our railway systems, a primary implement of these occupations, are cramped in that respect by inability to accumulate reserves in fat years as did other corporations, according to resolutions adopted at the annual meeting of the Railway Business Association.

for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly. If it doesn't, you should call a physician.

CHAPTER XII—Continued.

"I do," said Benny suddenly. "I'll make you answer me if you want one." Holliday laughed, and arose.

"I rather think my digestion won't stand for it," he replied. "And besides, I must go home and get ready for my guest. He comes back later and find out what you hear from the nurse, Mrs. Hastings. Just now little's waiting for my orders. It's time to see this man of yours about again, isn't it?"

He turned away, while Benny slid down the steps to join him, slipping his little hand into James Holliday's as confidently as he would have put it into Nick's.

"I got a oven where I bake 'em," he said apologetically. "Daddy made it. Daddy can make anything. I'll show you 'fore you go home."

"Gay," murmured Nick softly, "you ought to have seen Holliday's face when the kid offered him that pie! I don't believe he ever played in his life—or if he did he's forgotten how. But it's fine of him to do so much for that little girl."

Gay didn't answer. She was watching James Holliday heading above the pile of stones that was Benny's oven. In the silence she heard her mother's

he kept explaining: "You put 'em there first, so' them leaves 'em on the top, same as Mummy does, only you can't have matches. Daddy says most pie don't need matches. He says they're sun-baked, so' the leaves's more 'faster that-a-way. Some day when you get them I'll let you make 'em."

"Thanks," said James Holliday. "When my little girl gets better perhaps you'll teach her how to do it. I must go now. I enjoyed my refreshments very much."

"It wasn't 'refreshments,'" corrected Benny solemnly. "It was pie. 'Refreshments' is ice cream."

Holliday laughed. "I see. I'll try not to make such a mistake again. Good-bye, little chap."

"By," said Benny, and turned once more to his absorbing task.

Gay watched James Holliday go through the garden and take his own house.

"The little girl!" she exclaimed softly. "Did you hear that, Nick? Oh, wouldn't it be wonderful if—"

Nick smiled, and said: "My dear girl, have you forgotten the Holliday's careers?"

"Careers!" echoed Gay with scorn. She arose, and moved toward the door. "I must go in and telephone that nurse. I tell you what, Nick, Holliday, it's some career just keeping a family going! And if the Holliday's should keep that little girl—"

"You're an incredible day-dreamer," said Nick. "I'm glad you are; but—let me tell you I can't just see Mrs. Holliday adopting a child. She's rather keen on the subject of inheritance, and all that. I had the feeling that day that she thought I'd been foolish to try to save something that was, possibly, not worth saving. Was she right, Gay? I've been wondering—"

"There!" broke in Gay indignantly. "I know someone had put that idea into your head, because such thoughts aren't really yours. Just get rid of them, my dear. They don't belong to you. Why, Nick! even the least of us has the right to life—and how can you or I, or Mrs. Holliday, know what that little girl may have to give the world?"

Her eyes met his, and in one glance swept away the words of Angela Holliday's careful warning.

"You're right, of course, dear," he said quietly. "You always are right, Gay. I believe you are more true and straight than most of us; and yet—it's queer, but I felt as you do until she talked to me about it. Don't stay too long at that telephone. I want you."

"You're getting spoiled," she answered, brushing back his hair with a tender hand. "I'm neglecting everything."

"That doesn't matter," said Nick, smiling up at her. "So long as you don't neglect me, I shall continue to love the road while you keep me in this shade. I like being spoiled."

"I'm afraid," said Gay, with a quiet little laugh, "that I like spoiling you!"

CHAPTER XIII

The summer was waning, and after three weeks at "The Bird's Nest," where he regained the best of his diminished strength, Nick was back in the cage.

Five Days—

Best Evidence.

Mrs. Cameron, of Leigh, writes: "I suffered with biliousness accompanied by sick headaches for days at a time, and every medicine I tried failed to bring relief. A friend gave me some of your wonderful Carter's Little Liver Pills and the first dose gave me great relief. For three years I have taken them every night as a regulator and I find they prevent those bilious and sick headache attacks. I have five little boys and I give them three or four every week. I have great faith in them. Take Carter's Little Liver Pills. All druggists sell and 75¢ red package."

"It seems good to have him there," said John Maxwell to Mary, at the close of Nick's first day. "and I believe the boy is happy to be back, possibly because we were all so glad to see him."

"I met Gay down town, too," said Mary Maxwell. "She looked muddled, and pretty, and wore a smart little new gown that was tremendously becoming. I was surprised to see it. Their little must have been overwhelming these last few months."

"Possibly the dress was a gift," said John. "From whom? There's not a soul who'd think of such a thing. The truth is, Johnny, I've sometimes longed to give her a gown or two myself, but I thought she might not like it. She and James were always so much together that I've hated to think that Gay was going without the pretties a young girl wants—and she's still a girl, you know, in spite of her little family."

"I think you might give her something now and then, Mary. Gay's not the sort who would take offense. Can't you pretend you got them for yourself and they were—well—too small or something?"

Mary Maxwell glanced down at her generous proportions, and smiled at her husband's naive suggestion.

"I fear, my dear, that Gay would see through a subterfuge like that. Johnny, do you suppose old Mr. Bartlett gives her anything?"

"It wouldn't surprise me, though clothes are the last thing he would notice."

"I don't know. These days he was here with the ladies he noticed everything. He's a wonderful old man. I wish he'd give Gay an afternoon."

"Well, I don't," John Maxwell spoke with decision. "There's nothing better for a man than having to scratch gravel to provide for his wife and children. In my opinion Nick's marriage has been the making of him. Not that he wasn't all right before; but he needed help, and Gay provided that in just the right amount. I shouldn't want Thomas Bartlett to do too much for them."

"Well," sighed Mary, with a thought for the days when she herself had longed for the maintenance. "I suppose you're right, and possibly Mr. Bartlett agrees with you. I just once thought he wouldn't do for them if he thought that."

This was true. It sometimes took Thomas's heart not to lift up Gay's financial burdens. Only his shrewd good sense kept him from doing it. He had, however, taken care of the little inherited by Nick's father, saying when Gay protested, "It's only a loan, dear. Better owe me than the doctor. He needs it more than I do; and Nick can pay me back any time it comes handy."

"But I've the finished dollar you gave me, Uncle Sam. That's pay some of it. I can't go into debt to anyone, you know, and spend the money for silly things."

"I don't advise you to spend it for silly clothes, dear. Clothes don't stay if they make a woman look right in her man. It ain't often I give a present and tell him just what they get to do with it. That ain't no way to give; but this is different. You think now, and do your shopping. If you don't, I'll do it for you, and there's no 'howers' what outrageous dresses I might buy."

"When the smart little gown that

last night Mary Maxwell's approving eye, and which also caught Nick's when Gay appeared at the bank that afternoon.

"Where'd you get it?" he questioned through his little window, for even wonderful of the fact that Benny was begging for admission. "You look a peach. I bet you've overdone my account—and I don't care a darn if you have. If there weren't so many people round here I'd—"

"No love making allowed in banking hours," came from the next cage, as Johnny Symonds caught the drift of Nick's remarks. "How do you manage to get him going like that after all these years, Gay?"

Gay laughed. "The recipe's simple. Get a new gown and spring it on your man unexpectedly. You tell that to Mary."

"Nick's date?" said Johnny, smiling broadly. "Doesn't need any urging to buy new gowns from along, Gay. We need the services of our paying father, and he's still apologetic. Not that I blame him. You look a regular cozier like afternoon."

(To Be Continued.)

Soviet Farm Movement

Development of Farms To Be Encouraged in Russia

Soviet Russia is going "back to the farm," according to figures just issued by the government. During the last ten days in January and the first ten in February, a total of 128,000 families joined the collective farms, the figures show. This migration is the greatest in history. Development of these farms has always been the backbone of the Soviet movement.

Most of the families who have applied to join the movement came from the Ukrainian Republic, the North Caucasus, the upper and lower Volga and the German republic. They were expected to move to the farms gradually during the spring in time to get next season's crops planted.

Way Signs For Speeches

Automatic signals of the type familiar to motorists were used to flash a warning to speakers talking more than their allotted time at a dinner given by the National "Safety First" Association at the Victoria Hotel, E.C., in honor of the Royal Commission on Transport.

Boiler Shop King Corveto

The bridegroom was in a peevish frenzy as he strolled along the aisle. "Hill on, there deep and dark blue gown, red," he yelled to his bride.

"Oh, Corveto," she exclaimed "how wonderful you are. It's doing it."

BACKACHE

Wonderful relief from pain

Backache is one of those worrying complaints which lead all their victims together with a common bond of misery. And when any one suffers from backache there is a new remedy, following promptly the quick report of that discovery to others. There's a woman who has learned to thank for knowledge of a remarkably successful treatment. Now, perhaps, you'll be, in turn, to pass along the good news to you.

"I am writing to tell you of the great benefit I have received from Kravchenko's. My friend, Mrs. H., had suffered so much backache that she begged me to give Kravchenko a trial, although at first I was doubtful, because I had tried so many things. At last, however, I tried some of her Kravchenko, and, feeling hopeful, I purchased a bottle, and I can honestly say that before I had finished the bottle my backache was gone. I have suffered for years with kidney trouble and doubled backache, and now to be free from the pain altogether is wonderful." (Mrs. C.)

FREE TRIAL OFFER

If you have never tried Kravchenko—try it now at no expense. We have distributed a great many special "GAIN" packages which enable you to try it for you to secure our claim for money back. Ask your druggist for the new "GAIN" No. 1000.

The contents of our special No. 1000, bottle together with a complete trial bottle—valued at about one week. Open the trial bottle first, put it in the tea, and then, if not entirely convinced that Kravchenko does everything we claim it to do, the entire bottle is still as good as new. "Take it back." Your druggist is authorized to return your No. 1000, bottle and without expense. You have only to return the bottle to the nearest Kravchenko Co. or to the nearest S. G. Phillips, Ltd., Montreal, Quebec, Canada. Return the bottle to the nearest S. G. Phillips, Ltd., Montreal, Quebec, Canada.

Little Help For This Week

"They helped every one in his neighborhood; and every one said to his neighbor, 'Be of good courage.'"

— Isaiah 41: 10.

When we have thoughts of self interest, angels adjust our rights; And love that seeks the selfish good Dies in its own delight. How much we take, how little give,— Yet every life is meant To help all live; each man should live For all men's betterment.

— Allen Cary. Every human being whom we approach should be the better for us.— William Henry Channing.

Each of us is bound to make the small deeds in which he lives better and bigger; each of us is bound to see that out of that small circle the widest good may flow.

— Arthur Phelps Stanley.

Talking in German here, both learned in Polish.

"Dry" ice is to be introduced into Australia.

Made in Canada

ACID after meals

GET RID of your dread of pain after eating. Not without fear of "indigestion," nor stomach, disagreeable gas or heartburn.

When your food ferments, "disagreeable" gas like a lump in your stomach. It's a sign of too much acid. You need not resort to drastic methods—take instead an anti-acid that will correct the condition. Phillips' Acid of Magnesia.

A spoonful of this pleasant-tasting, soothing fluid neutralizes excess stomach acid. It relieves the gastric irritation before it is too late.

Indigestion and trouble—quite these signs in function as they should.

Phillips' Acid of Magnesia is what you need when a bad lunch, cooled tongue, headache, nausea or indigestion indicates an over-dosed condition. Take a spoonful today and for several days and see how it sweetens the system. You won't be nearly so likely to catch cold or stomach. All druggists in the Dominion sell it in the bottle.

Caution: Phillips' Acid is always a liquid—never a tablet. Look for the name Phillips on the bottle.

NOTICE.

RICHARD ROBERTS,
Formerly of Stony Plain in the Province of Alberta.

TAKEN NOTICE that Orlando G. Reinhard, through his solicitor George J. Bryan of Stony Plain in the Province of Alberta, alleging he has paid you the full purchase price offered for by the hereinafter mentioned agreement, has commenced an action against you in the Supreme Court of Alberta, in which he claims against you specific performance of an Agreement for Sale, dated the 2nd day of July, 1933, made between you and Frederick W. Leedy as Vendor and Ernest W. Bell as purchaser which Agreement for Sale was duly assigned to the said Orlando G. Reinhard on the 6th of January, 1933, by delivering to him to him a transfer of the S.W. 1/4, Sec. 18, Tp. 26, Rg. 1, west of the 5th Meridian, or for an order vesting the said lands in the plaintiff.

AND FURTHER TAKEN NOTICE that you are required on or before the **FIFTH DAY OF APRIL, 1934**, to file in my office in the Court House at Edmonton in the Province of Alberta, a Statement of Defence or Demand of Notice that notice of any application to be made in the action he given you, and serve a copy of same upon the Plaintiff's solicitor, and in default of your so doing, judgment may be filed against you without further notice.

This notice is published pursuant to the Order of the Master in Chambers dated the 28th day of February, 1934.

R. F. WALLACE,
C. M. C. A.

APPROVED,
"A. Y. H."
M.C.

GEORGE J. BRYAN,
Solicitor for Plaintiff.

With the Carlers

Winners of February points competition of the Women's curling club. The prizes for the Points Competition held during February by Women's curling club were won by Mrs. H. Oppertshamer ship, Mrs. Lewis, Mrs. Donaldson, Mrs. Brabbin.

At the redraw Saturday afternoon Mrs. Lory, Mrs. R. A. Walton, Mrs. Wadel, Miss M. Clarke were appointed the new skips.

The Eight Cylinder Ford.

A story was printed in The Sun a short time ago about Henry Ford's newest venture—an eight-cylinder car.

Like the article had come from a very reliable source, the printed story was looked on with skepticism by dealers and motorists, including those who should have been better posted than they were.

It appears now there is a possibility that one of these eight-cylinder cars will arrive in Stony Plain by trail, some time this Spring, if present arrangements to this end succeed.

If you see it in The Sun—It's So.

And New Gasoline's Down.

Three gallons for a dollar—if you have the \$.

On top of the good news for motorists circulated some time ago as to the refund of five bucks on your auto license, comes the announcement of a reduction in the price of gasoline.

Sommerfeld & Mayer, the agents here for the British America Co., put the reduction in price in force Monday, and they're now selling that well known brand at 32½¢ a gallon. Prices are now 4½¢ per gal. less than last fall and 7½¢ under the pre-war level.

Edmonton district is given a special benefit of ½¢ per gal. under the new price list, as the cut is only 2¢ in other parts of the prairie west.

Over production of crude oil in the United States, where drastic reductions in prices have been made, is the cause of gas prices being lowered, says one authority.

Bright Back Brisk

The sudden cold spell that hit us last week came as quite a surprise to the natives here. Reports of 25 below were a daily occurrence. It is rumored that several of the wild geese which came north a few weeks ago were found frozen to death last Friday, on the Rice Pudding Marsh.

A very successful meeting of this U. F. Local was held in Lackaw schoolhouse the night of the 8th. There was a good attendance of members present, and a lot of important business was transacted. Visiting members from other Locals were present, and several good speeches on current topics of interest were made by them.

This U. F. Local is arranging to hold a whist drive on a nearhand date. Another dance and minstrel show are also on the tapis on a post-Easter date.

Easter Monday Dance

Undisputed Queen of the Pacific

PACIFIC OCEAN RECORDS

New Times Complete With Old.

Route	Miles	Empress of Japan	Empress of Canada	Time
Yokohama to Vancouver	4280	8 3 18	8 10 53	
Vancouver to Honolulu	2329	4 15 50	5 13 50	
Honolulu to Yokohama	3379	6 9 43	7 5 11	

Kobe to Yokohama
333 miles
Empress of Japan (19th Nov)
Previous Record 19th.

Smashing record after record, the beautiful 25,000-ton Canadian Pacific liner "Empress of Japan" holds an established reputation as the queen of the Pacific Ocean, both in speed and comfort. Her latest accomplishment, on her last 4,280-mile trip, west-bound from Yokohama to Vancouver, was to complete her journey in 8 days, 3 hours and 18 minutes, thus beating her own previous record by 3 hours and 44 minutes. Apart from this she holds records

between Vancouver and Honolulu; Honolulu and Yokohama and Yokohama and Kobe. The last-mentioned record is considered the ship's best speed performance in Japan's history. The commander of this great White Empress, Captain Samuel Robinson, indicated after her last trip that she has still more power in reserve and may well hang up another record in the near future.

Church Services.

The services at the morning service at St. Matthew church (Missouri Synod) was delivered by Rev. Professor Schermerhorn of Concordia College. Following the English Lutheran service in Stony Plain on Sunday evening last, when the service was conducted by Rev. H. Karing a series of lantern slides "Mission in India," were shown, this being a Missionary service.

Services in St. Philip's Church next Sunday, 11.30 a.m. United Church service every Sunday Evg. at 7.30.

Heard on Main Street.

"I understand your wife is quite ill."
"Yes, she had a slight cold; tried to cure herself by reading a daily health hint and is suffering from a typographical error."

The Dumb Professor.

"What has a mother in view when she speaks her disinclination child?" asked a professor in moral philosophy. And then he couldn't understand why the pupils looked at each other and smiled.

Zoning Bylaw No. 3.

Municipal District of logs, No. 520.

Edmonton Beach.

NOTICE IS HEREBY GIVEN that the Council of the Municipal District of Logs, No. 520, intend to pass a Zoning Bylaw under the provisions of Section 20 of The Town Planning Act, 1906. A copy of the Bylaw may be seen at the office of the Secretary-Treasurer between the hours of 10 A. M. and 4 P. M. on any day not a Sunday or a public holiday. At the Town Hall, Stony Plain, on Thursday, the 26th day of April, 1934, between the hours of 2 P. M. and 5 P. M., the Council will meet for the purpose of hearing any objections to the Bylaw.
